

Faster, smarter data insights with a rapid ROI catalogue

Deliver better data governance and data sharing as a service

Changing expectations within the public around data access & transparency require strategies that deliver faster access to data without sacrificing security.

Go beyond cataloguing to implement a holistic data platform to reduce the risk of disclosure of sensitive data and increase ongoing value generation from data.

Using Aristotle Metadata you can get a faster return-on-investment (ROI) by leveraging interest in data sharing to improve data quality by:

- Engaging users & business users across the entire organisation
- Improving the efficiency of data governance
- Increasing oversight of data using out-of-the-box CDO dashboards

Demonstrate data governance leadership

Get results

Accelerate digital adoption of data governance using Aristotle Metadata Software-as-a-Service solutions.

Increase efficiency of data requests using metadata-driven systems that improve data security and data discoverability.

Delivered by Aristotle Metadata

We helped a government department build a data profiler to index data assets in a central location to search across data lakes.

This was supported by a Tablion Data Portal that delivered an end-to-end system which **reduced time to respond to data requests by 50%**.

Improve corporate knowledge retention and adoption

Get results

Improve adoption by giving staff skills that promote career growth.

Reduce vendor lock-in with a system built on tested standards.

Improve talent acquisition and reduce onboarding time with easy to user interfaces.

Delivered by Aristotle Metadata

Our client leveraged widespread adoption of Aristotle Metadata to bring in expert staff on secondment.

This accelerated adoption to hundreds of users in all areas across their agency to **document 80% of key data assets within 6 months**.

Ease of procurement to deliver faster ROI

Get results

Validate business requirements before lengthy procurements using free platform trials.

Procure faster through the Digital Marketplace Panel using DTA-approved contract templates.

Achieve outcomes faster using software-as-a-service platforms available on-demand.

Delivered by Aristotle Metadata

A federal government client selected Aristotle Metadata to build a multi-agency data management system using the DTA marketplace to streamline procurement.

Within 3 months they delivered a production system rolled out organisation-wide with migration, tailored training, and strategy development to maximise success.

ARISTOTLE metadata

Instant overview of data governance

Executive dashboards provide instant, up-to-date overviews of data governance activities.

Regular updates delivered to your inbox give a proactive snapshot of activity.

Target gaps in data coverage

Find business areas that need support to increase adoption.

See the common “missed” searches for data not captured in the system to focus on high impact activities.

Unify governance and data requests

Track common data requests and see how long data requests take to resolve.

Support efficient data requests with metadata to improve the self-service experience.
